Dronten, 09-08-2023

STATEMENT ABOUT REACH

Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) is a European Union regulation EC No. 1907/2006. Polymers are in general exempt from the obligation to register under REACH, because they are mixtures (preparations). Therefore, all our products made from the polymers do not have to be (pre-) registered.

The individual parts of the mixtures, all building blocks of the polymers, must be (pre-) registered- the requirements of Article 6(3) of the REACH regulation.

According to the statements of our raw material suppliers and our present knowledge, all substances present in the raw materials used to produce our products for Join the Pipe in an amount ≥ 2% by weight, have been (pre-) registered.

According to the statements of our raw material suppliers and our present knowledge, substances mentioned in the Candidate List of Substances of Very High Concern for Authorisation [published in accordance with Article 59(10) of REACH Regulation 1907/2006] mentioned in the link:
https://echa.europa.eu/candidate-list-table
are not present in the concentrations above 0,1% w/w in the Flestic B.V. products for Join the Pipe (last update 14-06-2023).

From January 5, 2021 suppliers of articles on the EU-market containing Candidate List substances in a concentration above 0.1% weight by weight must notify these articles to ECHA's SCIP-database.
Our food grade products are not obligated to be registered in SCIP-database.
